

WINSTON NGOUI

Unity Developer

+65 9173 6633

winston.ngoui@gmail.com

winston-ngoui.github.io

Birthday: 31 Aug 2001 (25 y/o) **Nationality:** Singaporean

EDUCATION

Bachelor of Arts in User Experience and Game Design

DigiPen Singapore

2024 - Present

Expected date of graduation: 2028

GPA: 4.69 / 5

Diploma in Game Development Technology

Nanyang Polytechnic

2018 - 2021

GPA: 3.45 / 4

SKILLS

- Unity (Unity 3D / Unity 6)
- C# (Primary), C
- XR Interaction Toolkit
- Meta Quest (Oculus)
- Debugging & Performance Profiling
- Git Version Control
- Agile/Scrum

LANGUAGE

- English (Fluent)
- Chinese (Basic)

PROFILE

Unity Developer experienced in building real-time interactive experiences using C# and Unity. Skilled in gameplay systems design, prototyping, and implementing core mechanics such as UI, physics, and animation, with experience iterating on gameplay from concept to in-engine execution. Interested in gameplay programming and systems-focused game development roles.

WORK EXPERIENCE

iMMERSiVELY

Aug 2021 - Sep 2021

Solo Developer

- Developed and delivered a VR application for a client wedding proposal using Unity and C# on the Oculus (Meta Quest) platform.
- Implemented interactive systems, UI, and gameplay logic, including user interactions, scene flow, and event-driven triggers.
- Built and optimized VR-ready scenes, handling asset integration, performance tuning, and XR toolkit setup.
- Collaborated directly with the client to gather requirements, iterate on features, and refine the experience based on feedback.

PROJECTS

Groovity

Apr 2026 - Apr 2026

(3D Puzzle Platformer, Unity Engine, team of 5)

- Developed in one week as part of the Century Games Game Jam 2026.

Soot & Scoot

Sep 2025 - Mar 2026

(2D Stealth, Unity & Custom Engine, team of 8)

- Led the project as Product Manager and Design Lead, overseeing end-to-end game development from concept and prototyping to implementation.

Toxic Tide

Jan 2025 - Mar 2025

(2D Endless Runner, Unity Engine, team of 5)

- Developed core gameplay systems including grappling hook mechanics, camera behavior, audio systems, and data serialization in Unity using C#.
- Led task planning and feature scoping to ensure on-time and feasible delivery.
